From: SFI Foundation, Inc.

**Notice of Products Falsely Represented as Certified to SFI Specification 3.3 by  
“AIM International” of Sialkot Pakistan**

---

Please note that SFI has found Shoes and Gloves manufactured by AIM International which are falsely represented as certified to SFI Specification 3.3, some of which bear counterfeit SFI labels. SFI obtained examples of some of these products and determined through testing that they DO NOT meet the performance requirements of the SFI Specification 3.3. AIM International is not now and has never been enrolled in the SFI 3.3 (Driver Accessories) program.

It should be noted that for any spec program, certification that products meet the minimum standards is made by the submitting manufacturer. Products are NOT certified, endorsed or approved by SFI.

Retailers and other entities looking for suppliers to market products certified by their manufacturers to SFI specifications under private label agreements should check the list of participating manufacturers list on SFI's website:

<https://sfifoundation.com/specifications-participating-manufacturers/>

**Also, SFI Specifications require that the certifying manufacturer's name or logo appear on or in the product, even when another name or log also appears on the product due private branding.**

Please contact SFI with any concerns or inquiries about questionable product or manufacturer.
